Clerk.

MR. KEMP SANBY.

Matron and Housekeeper.

MISS. S. MIDDLETON.

Store-keeper.

MR. J. BROWN.

REPORT

OF THE

COMMITTEE OF VISITORS.

To the Court of Quarter Sessions for the County, and to the Town Council of the Borough of Nottingham.

In pursuance of the Statute 16 & 17 Vict., cap. 97 sec. 62, the Committee of Visitors make their report as follows :—

The number of lunatics of all classes under care this day, the 31st December 1868 consists of

MALES.	FEMALES.	TOTAL.
168	186	354

The space left unoccupied is sufficient for 75 patients, viz. :—

MALES.	FEMALES.	TOTAL.
34	41	75

The Asylum can therefore accommodate 429 patients, viz. :—

MALES.	FEMALES.	TOTAL.
202	227	429

There is consequently ample room for the reception of patients of each sex.

A gallery in the new wing has been occupied by the women, who were found to be rather overcrowded on the basement, and the inconvenience occasioned thereby, has been counteracted by their removal.

At the close of the year 1867, the numbers were :—

	MALES.	FEMALES.	TOTAL.
On the books	167	171	338
Admitted since	38	55	93
Discharged recovered ..	13	13	26
Relieved	4	4	8
Not improved	1	0	1
Died	19	23	42

Compared with the previous year the changes are as follows :—

Year.	Recoveries.	Admissions.	Removals.	Deaths.	Patients Dec. 31.
1867 ..	95	39	19	43	338
1868 ..	93	26	9	42	354

The statutory inspections of the Asylum and of the inmates have been regularly made by your committee, and the condition of both recorded as very satisfactory.

The Commissioners in Lunacy made their annual visit, and reported thereon on the 11th of February last. The latter will be printed and circulated as usual with the accounts.

The Rev. W. H. Wyatt resigned the appointment of chaplain in July, after a lengthened period of service of 37 years. The committee granted him an annuity of £40, by way of superannuation under the powers of the 16 & 17 Vict., cap. 97, sec. 57, which has since been confirmed under the 25 & 26 Vict., cap. 111, sec. 12. The Rev. S. H. Lanphier, chaplain to the county prison, has been appointed to the vacant office.

By the death of Joseph Watkinson, an old servant of the institution, an annuity of £20 per annum ceased on the 10th of May last.

Plans and specifications for the erection of a new recreation room were submitted for the approval of the Secretary of State, but structural objections to the design having been made by the Lunacy Commissioners, the subject has been postponed for the present.

J. C. Cane,

CHAIRMAN.

ANNUAL REPORT

OF THE SUPERINTENDENT.

Mr. Chairman my Lord and Gentlemen,

I have the honour to present my yearly report of the number of admissions, removals, and discharges during 1868, and of the general condition of the patients and other matters relating to the state of the Asylum.

The numerical particulars are set forth in the following table :—

				M.	F.	T.
Patients remaining 31st December, 1867				167	171	338
Patients admitted during 1868				38	55	93
Total under treatment.....				205	226	431
	M.	F.	T.			
Discharged—recovered ..	13	13	26			
Discharged—relieved	4	4	8			
Discharged—not improved	1	0	1			
Died	19	23	42			
	37	40	77	37	40	77
Remaining 31st December, 1868				168	186	354

There is an accumulation of sixteen lunatics, namely, one man and fifteen women over the numbers remaining at the close of the preceding year.

This excess of patients must be distinguished from an increase of insanity. The table of admissions shows that the new cases

were only 93, or 2 fewer than in 1867. The accumulation depends chiefly upon the character of the cases admitted, whether they are acute and amenable to early treatment, or whether they are chronic and permanent ones. It is well established that the majority of curable patients leave the Asylum convalescent during the first year of treatment, while the aged and demented remain under care until they die.

A few years ago it would have been deemed an unusual proceeding to send to the Asylum imbecile persons from 70 to 86 years of age to be confined as lunatics, nevertheless twenty persons of this class have been received here during the last two years. The expectation of life of persons of the age of 70 and upwards is between six and seven years.

Some reduction might be made in the number of harmless and idiotic patients if their friends or the guardians of the poor would consent to take charge of them. In order to prevent unnecessary trouble or expense they might be sent out on trial to their respective localities.

The cases considered curable, including doubtful ones, are only sixteen men and forty women, out of a total of 354 persons. With the constant succession of admissions, there is therefore no prospect of any immediate reduction in the number of patients, unless by the removals above suggested.

The daily average of patients resident throughout the year was 343, or six more than in 1867.

The re-admissions were two males and eight females.

Twenty-six persons left the Asylum recovered, or about 28 per cent. on the admissions. The majority upon leaving were assisted with contributions from the convalescent fund, and thus enabled to provide for themselves temporarily. This fund now amounts to £1,150 consols and £176 14s. 11d. dividends.

The deaths, forty-two, were due to ordinary causes of disease affecting the insane, and from which many were suffering when admitted. Thirteen were 60 years of age and upwards. An inquest was held upon one person only, who died suddenly, and the jury returned a verdict, "That the deceased died from apoplexy, produced by softening of the brain, and not otherwise."

Two women, admitted in a state of pregnancy, were delivered during paroxysms of mania. One child was still-born; the other left the Asylum in good health, accompanied by the mother, who had recovered.

Three persons voluntarily applied for admission in the early part of the year, each labouring under a different form of insanity. The first, a man suffering from chronic mania, had been a patient here thirty-seven years before; the second was a female—case melancholia—who had formerly made a similar application; and the third, a young man labouring under epileptic imbecility. All three were consigned to their friends.

I have pleasure in again recording that there has been no case of suicide.

Perhaps no more favourable testimony of the value to the public of this and other similar institutions could be adduced than the statistics relating to suicide.

The last return of the Registrar General shows that twelve men and six women voluntarily sought death in the county of Nottingham, in the year 1866; and this was conspicuously below the average of the preceding four years, as will be seen by the subjoined table:—

Year.	Males.	Females.	Total.
1862	20	8	28
1863	20	11	31
1864	18	7	25
1865	19	5	24
1866	12	6	18

The proportion of suicides consummated for every million of persons of the population of England and Wales in 1866, was 64, and the annual ratio is nearly uniform.

The conduct of the attendants and nurses has been generally meritorious. Many have been in the service of the county and borough for a long period, and their knowledge of the habits of the patients has doubtless, in some degree, contributed to the prevention of serious casualties and violence. All which is respectfully submitted.

Wm. Phillimore Stiff, M.B.,

SUPERINTENDENT.

COUNTY AND BOROUGH LUNATIC ASYLUM,
SNEINTON, NEAR NOTTINGHAM,
JANUARY 21ST 1869.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

NOTTINGHAM COUNTY AND BOROUGH ASYLUM,

11th February 1868.

WE have inspected this Asylum, and seen all the patients except two—one of each sex—who are absent on trial. There are now on the books the names of 164 men, and 173 women, total 337. Sixteen men and eighteen women have been admitted since our colleagues visit on the 24th of last August, and in the same interval eight men, and sixteen women have been discharged, and eleven men and five women have died. Of the patients discharged twenty-one were recovered. The deaths were all from ordinary causes. In one case an inquest was held on the body of a female patient who was found dead, when it appeared that the cause of death had been epilepsy. The numbers have diminished since the last visit, and there is now in the Asylum vacant accommodation for 92 patients, 38 in the male and 54 in the female division. Many of the vacant rooms are not yet furnished, and it appears that the Visitors decline to receive patients from other districts. We think, therefore, that it would be well if the very excellent rooms now vacant in the

wings were used by some of the present inmates of the old building, who, in some of the wards are rather crowded, and who, in the basement ward (No. 1) in the female division, are by no means well accommodated. It is proposed to board the floor of the day room of No. 1 ward, and the gallery has already been done, but no change would make the room in question suitable, and we strongly recommend that the whole of this ward be disused for the present, and that its inmates be transferred to the wing.

The patients at the time of our visit were remarkably free from excitement. Their clothing was generally good, and their persons clean. Eleven men wore strong fustian dresses, of special and peculiar construction. Five men and ten women were in bed, but not in consequence of serious bodily illness, and the present sanitary condition of the Asylum is satisfactory.

There is a large proportion of old chronic imbecile cases, and it would seem that difficulties are found in inducing them to enter upon useful occupations. The numbers regularly employed are very small. Of the men only 15 work on the land, and 11 at trades such as tailors, brewers, bakers, upholsterers, and smiths. There are no shoemakers, and even repairs are not done in the Asylum.

Of the women, 35 are occupied in the laundry, 7 in the kitchen, and 28 in needle-work. The subject of employment is one of so much importance, that we hope it will receive the early attention of the Committee and the Superintendent. We recommend that shoe-making, mat-making, carpentering, and other trades should at once be introduced, and attendants engaged capable of giving instruction in them. The present staff of attendants struck us as being much below the average, consisting of only nine in the male and nine in the female division, or in the proportion of about 1 to 19 patients.

Prayers are read in the Chapel on Sunday, when the average attendance is 57 of the male and 87 of the female sex. On Thursdays, 46 patients of each sex are present. No case of restraint is reported since the last visit, but 6 men have been secluded on 43 occasions, and 15 women on 62 occasions.

The want of a recreation room is still greatly felt, and we are glad to learn that the subject has been under the consideration of the Visitors, and we hope no further time will be lost.

A portion of the women take exercise in the ornamental grounds, but the number of this sex who are permitted to walk beyond the Asylum precincts is much smaller than on the male side.

We have again a very satisfactory report to make as to the clean and orderly conditions of the wards and bedding. The grounds also are in excellent order, and the whole establishment in a state creditable to the zeal and activity of the Superintendent.

W. G. Campbell,

James Wilkes,

COMMISSIONERS IN LUNACY.
